To whom it may concern,

I would love the chance to become part of the team and bring excellent content to life together. You can see my previous work below at the links provided and attached resume to give you an overview of what I have accomplished with great teams behind every project and position I have held.

Best way I can represent who I am, is to give me a call and I'll share stories of life and work. Then let me introduce myself in person and I'll follow up after to show you why I am the right fit for your team. I am a leader and team player, and I have the skills necessary for the position thanks to many experiences. I will always go above and beyond the call of duty on every project. I crave to work with amazing people and share the same vision to completion, from past to present with narrative, commercial and beyond.

I am a game changer who guarantees to make the impossible-possible, chaos-organized and life worth living for every moment. Give me the opportunity, test me out, let me work with your team to bring a project to life and I know you will not be disappointed. My experiences and the teams I work with speak highly and positive of working together with proof in audio/video as well as personal stories. You see I am the guy that will always think out of the box, very diligent in my works and bring to you not just my great work ethic but also my passion.

Thank you for your time and looking forward to hearing back from you soon.
