

Christiann Burch

Music Composer & Sound Designer

With work also in Location Recording and Boom Operator

BIO

Experienced Sound Designer, Boom Op & Sound Recordist with an Associate's Degree in Audio Production from International Academy of Design & Technology. I possess 11.5 years experience in music production, 3.5 years experience with the recording arts and 2 years experience with production sound & post production sound for film. I am very passionate about sound design and enjoy creating dynamic soundscapes and music that enhance the film's storyline. I equally take pride in acquiring the best quality audio on location for filmmakers. I enjoy the challenge and focus of acquiring good dialogue driven audio regardless of the recording environment. Within just a few short years I've been fortunate to work with several different genres of films including horror, suspense, drama and sci-fi. I look forward to collaborating with many new filmmakers and expanding my network along the way.

EDUCATION
