Summary

I'm excited about sound for film, acting, filmmaking and tech. My previous career in Computer/Network Support helped me strive to maintain a calm and professional demeanor in high stress situations, work well independently or on a team and have a high degree of attention to detail. I've transferred those skills towards a career in Entertainment. I enjoy honing my skills as a Sound Recordist for Independent film and look gaining more professional on-set experience. Being involved with the 48-hour film competitions, has allowed me to take on and continue my learning of other production roles, such as, 1st AC and Script Supervisor. I'm also looking to develop a strong career in Acting. I enjoy various hobbies in Photography, Narrative Social Gameplay, Sketch Comedy, Video Games, Video Editing, Sound Design and Field Recording.
